Technical Visit to the Oncology Centre & ID Block of Princess Margaret Hospital

Oncology Block

The Oncology Block houses the Kowloon West Cluster Oncology Centre and the Accident & Emergency Department. It is officially opened in May 2006. Being the tertiary oncology referral centre in this Cluster, the Centre provides a wide spectrum of oncology services including in-patient, out-patient, day chemotherapy and radiotherapy services. A Cancer Patient Resources Centre is fitted inside the Building to render psychosocial support to patients and their relatives.

Taking up the role as the Major Trauma Centre in this Cluster, the new Accident & Emergency Department is equipped with the state-of-the-art trauma resuscitation facilities. All major trauma patients in the catchment areas of Princess Margaret Hospital, Yan Chai Hospital and Caritas Medical Centre will be sent from the trauma site to this Trauma Centre for timely intervention.

Hospital Authority Infectious Disease Centre (HA IDC)

The HA IDC is built at the site of Princess Margaret Hospital. This 17-storey building is the first ID Centre in Hong Kong with cutting edge isolation facilities. It serves as the hub for local and international collaboration in managing infectious diseases and acts as a Training and Research Centre for developing medical personnel and other healthcare professionals.

Four Basis Principles are used in the design of ID facilities:

- Segregate clean and dirty zones
- Contain contamination
- Control and remove contaminants
- Minimize physical contacts
