

BUILDING TECHNOLOGY SOLVING THE  
CRISIS OF ENERGY SECURITY AND  
SUSTAINABILITY TODAY

# BUILTECH CONFERENCE

8-9 SEPTEMBER 2009

THE MIRA HOTEL  
HONG KONG

**SPEAKERS INCLUDE**

MARK HARGRAVES, HEAD OF PHYSICAL SECURITY, HSBC  
ALBERT SO, DIRECTOR OF INTEGRATED SOLUTIONS, JOHNSON CONTROLS  
OSCAR CHAN, DIRECTOR, MACAU MANAGEMENT ASSOCIATION  
PHILIP LO, CHIEF EXECUTIVE OFFICER, LEXOS GROUP  
STEPHEN JONES, REGIONAL MANAGING PRINCIPAL, WOODS BAGOT

**PROGRAMME HIGHLIGHTS:**

- Building owners and managers face power consumption and conservation issues on a day to day basis. At BuilTech we explore the pressure to ensure power stability in mission critical facilities design, realities of zero energy buildings and consider potential futures such as the Smart Grid scenario in China.
- Building technology is playing a leading role with some companies meeting demand for cost-cutting and creation of new revenue streams through innovation. BuilTech attendees will learn what technologies work and those that are suitable for their operations.
- Expert speakers will map the rising role of Building Information Modelling (BIM) and design software, examining not only how these technologies are shaving millions from construction and retrofit budgets, but how to know if the model can ensure the finished product lives up to its promises.
- Largely made up of end-user case studies, BuilTech aims to provide practical solutions for people facing problems now in the areas of fire and safety, energy management, water conservation, lighting, controls, building automation, security and more...
